

# Ido Tanne | Full-Stack Web Developer

Boca Raton, FL, United States

📞 2012493030 • ✉ [idovader@gmail.com](mailto:idovader@gmail.com) • 🌐 <https://github.com/itanne99>

## Basics

---

Results-oriented full-stack web developer with 3+ years of experience building and maintaining high-quality web applications. Proficient in a variety of technologies, including React, .Net, MSSQL, Azure DevOps, and Okta. Proven ability to work independently and as part of a team to deliver projects on time and within budget.

## Education

---

### New Jersey Institute of Technology

*Bachelor, Information Technology*

*Sep 2018–May 2022*

## Work

---

### Deloitte

*Analyst 2 / Full-Stack Engineer*

*Sep 2022–Present*

#### Florida ACCESS Modernization (Jul 2023 - Present)

- Implemented Okta to secure access for 4,000 users. This included a custom login, auto-login, and role-based access.
- Developed ASP.NET REST APIs for data exchange. This powered user search, client search, and third-party integrations.
- Engineered features using the LIFT Framework to secure PPI data presentation.
- Built a React and Bootstrap UI to improve accessibility for employees.
- Managed Postgres, MSSQL, and Oracle databases. Created relationship tables, indexed million-row tables, and wrote SQL queries.
- Integrated AI agents to plan code changes, analyze defects, and optimize SQL queries. This increased performance by 25%.
- Built MCP servers to connect AI models with Azure DevOps for bug ticket resolution.
- Developed MCP servers to let AI read system libraries and fetch database queries.
- Created an MCP server for note tracking to organize developer work.
- Built a DevContainer to speed up team onboarding to the repository.
- Engineered a comprehensive testing suite to guarantee software stability. Built automated unit tests for C# REST APIs to secure the backend. Integrated Jest for React components to maintain UI reliability.
- Integrated document flow from scanners to Azure Storage Accounts and OnBase.
- Built a document editor for employees to split and index documents.
- Developed search systems using Okta data.
- Created Python scripts and batch processes. This saved 2.5 hours of manual work per day.

#### Cloud Service Client, Artificial Intelligence Division (Nov 2022 - Feb 2023)

- Focused on generating natural language training data for various scenarios, including recruitment, incident reporting, and team task tracking.
- Generated training data, labels, and extracted information as SQL annotations pushed directly to databases, spanning 9 business use cases and resulting in 4,000+ natural language datasets.
- Identified repetitive patterns and developed web-based tools using React.js to enhance team efficiency and streamline project workflows.
- Optimized text input for a Generative AI-based product and identified business processes for machine learning model ingestion.

## Languages

---

**Hebrew:** Native or Bilingual Proficiency

## Skills

---

**Programming Languages:** Intermediate      **Keywords:** Python, JavaScript, C#, C++, Java, SQL, HTML, CSS

**Frameworks:** Intermediate      **Keywords:** React, Next.js, ASP.NET, .NET Core, Entity Framework Core, Django, Flask, Express, Bootstrap, Jest

**Databases:** Intermediate      **Keywords:** Postgres, MSSQL, Oracle, MySQL, Supabase, Redis, Firebase

**DevOps & Deployment:** Intermediate      **Keywords:** Azure DevOps, Docker, Heroku, Vercel, Unraid, DevContainers, Azure Storage Accounts

**OS:** Intermediate      **Keywords:** Linux, Proxmox, Windows

**Artificial Intelligence:** Intermediate      **Keywords:** GitHub Copilot, Google Gemini, Gen AI Workflows, AI Agents, MCP Servers

**Authentication & Tools:** Intermediate      **Keywords:** Okta, OAuth, Figma, Photoshop, Illustrator, OnBase

## Projects

---

### Gabay Estate Management

- Engineered a comprehensive real estate property management portal enabling seamless connection between managers and clients.
- Integrated Stripe for secure and smooth financial transactions.
- Facilitated advanced scheduling capabilities, improving coordination between property managers and clients.

**Keywords:** Next.js, Stripe, Supabase, Vercel
